On occasion there are patients that do not respond to treatments so the outcome cannot be guaranteed. Alternative methods are available from dermatologists or plastic surgeons.

The following problems may occur with the cellulite light system.

- 1. There is a risk of scarring.**
- 2. Short term effects may include reddening, mild burning, temporary bruising or blistering.** These conditions usually resolve within 1-3 months, but **permanent color change is a rare risk.** Avoiding sun exposure before and after the treatment reduces the risk of color change.

- 4. Bleeding:** Pinpoint bleeding is rare but can occur following treatment procedures. Should bleeding occur, additional treatment may be necessary.
- 5. Compliance with the aftercare guidelines is crucial for healing.**
